PUNTA PITT

TOUR DESCRIPTION

At the northern part of the island, this site is home to all three booby types – red, blue and Nazca.

In this area, you will enjoy activities such as hiking and snorkeling around Pitt Island. This is a full day tour and is accompanied with a visit to the Galapaguera Natural or Cerro Brujo. The departure dates are dictated by the Galapagos National Park and do not leave daily. Especially if you want to see a particular site, we ask that you have flexibility in the day of the week you depart.

Diving is also available to this site.
